RE: Tactical Tracker Training

This letter confirms that Counter Insurgency gave a 5 day tactical training course to our members at Nyathi Anti-Poaching Unit.

This course was well worth it as it was conducted in a highly professional and proficient manner. Our members were given a high standard of knowledge identifying and tracking spoor as well as mastering GPS systems and gathering of intelligence. They were evaluated to just as high standards at the end of the course and given well-earned certificates and badges.

We highly recommend this company and the course they offer.

Regards

Barend Lottering
